## **DETAILED ACTION**

### ***Continued Examination Under 37 CFR 1.114***

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 10/31/07 has been entered.

### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 12-13 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement and the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. Claims 12 and 13 are single means claims and the scope of the claims is not commensurate with the specification and therefore are subject to undue breadth. See below.

**MPEP 2164.08(a) Single Means Claim**

A single means claim, i.e., where a means recitation does not appear in combination with another recited element of means, is subject to an undue breadth rejection under 35 U.S.C. 112, first paragraph. In re Hyatt, 708 F.2d 712, 714-715, 218 USPQ 195, 197 (Fed. Cir. 1983) (A single means claim which covered every conceivable means for achieving the stated purpose was held nonenabling for the scope of the claim because the specification disclosed at most only those means known to the inventor.). When claims depend on a recited property, a fact situation comparable to Hyatt is possible, where the claim covers every conceivable structure (means) for achieving the stated property (result) while the specification discloses at most only those known to the inventor.

Applicant should be aware that parts of this disclosure would indicate that there are elements of the disclosure which could cause issues with 35 U.S.C. 101.

***Allowable Subject Matter***

Claims 1-9 are allowed over the prior arts of record.

The following is a statement of reasons for the indication of allowable subject matter: Claim 1 recites the following steps for generating a reference transmission signal to test a communication system:

“...capturing a data packet transmission signal containing a plurality of reference data;  
digitizing said data packet transmission signal;  
retrieving at least a selected portion of said plurality of reference data from said digitized data packet transmission signal to produce a plurality of retrieved data;  
modulating a carrier signal with said plurality of retrieved data to produce a digital transmission signal;  
storing said digital transmission signal following said modulating of said carrier signal and prior to a use of said digital transmission signal in producing said reference transmission signal for transmission and demodulation;  
retrieving said stored digital transmission signal; and quadrature frequency up-converting said retrieved digital transmission signal to produce said reference transmission signal.”

As such, modification of the prior art of record can only be motivated by hindsight reasoning, or by changing the intended use and function of the prior arts themselves. Therefore, it is not clear that one of ordinary skill in the art at the time of the invention would have made the necessary modifications to the prior art of record to encompass all of the limitations set forth in the present claim 1. Moreover, none of the prior arts of record, taken either alone or in combination, anticipate or render obvious the claimed inventions. Hence, claims 1-9 are allowable over the prior arts of record.

***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. See form 892.

The examiner invites applicant to call and schedule an interview prior to responding to this office action if there are issues in the above rejection which are not clear or if applicant believes it would be helpful to discuss the claim language required to overcome the rejections above.
